CHRYSANTHEMUM, ALEX CUMMING (B.N., 1952)

ALEX CUMMING

(B.N., 1952.) By far the best-selling Mum novelty in Bristol's history. A magnificent ornament from October 3 on, this lusty plant bears stupendous blooms, often 4 inches across. Color—a royally vivid cerise, softly shading to rose with entrancing gold tints in center. Breathlessly beautiful blooms incurve at center and recurve at petal ends. A splendid cut flower; try some disbudded. Do not overfeed this 2½-foot treasure. It's vigorous and bountiful by nature!

\$1.25 each; 3 for \$3.50; \$12.45 per doz.

We supply strong Mums from deep 2¼-inch pots, ready and eager to start growing for you. Stock has been pre-treated with sodium selenate, insuring plants free of nematodes and many other insects.

ALL MUMS AND PERENNIALS POSTPAID TO YOUR DOOR

Guarantee

Plants are like people—living creatures occasionally subject to ills and fits of temperament. They need some care both from the nursery supplying them and from you, the recipient. Also, plants are usually shipped in a state of relative dormancy; at that time they appear quite small in most cases. As a rule, they will take hold and grow for you with a little help.

We want to keep our old customers and to add new ones annually. Hence we will do our best to keep everyone satisfied. We will replace or refund the money on any United States shipment arriving in poor condition. Please let us know within 5 days.

Postpaid Policy

Just about everything in this catalog is sent to you postpaid. The very few exceptions are carefully brought to your attention.

Time of Shipping

We ship orders when the time is safe and proper for your locality. Mum plants, being started under glass, should not be set out until frost danger is past.

LOCAL TRADE. We recommend the period from May 15 to July 1 for Mum planting hereabouts. About June 15 is a happy medium.

Did You Know

that the ratio of new varieties of Mums introduced to seedlings raised for trial is roughly 1 : 1,000? From about 5,000 seedlings, mostly hand-pollinated, set out annually we seldom name over 5.

Living Gifts

FOR YOUR GARDENING FRIENDS

This spring we are instituting a plan whereby you may order items we have to sell as gifts to your friends. We have a beautiful Gift Certificate we will send your friend upon hearing from you. Simply tell us your address, his or her address and the amount you wish to spend. If you wish to order specific plants or sundries, you may do so on the enclosed order blank. We will send the Gift Certificate and our latest catalog to your friend at once. The plants, etc., will follow at the proper time for the locality in question. This Gift Certificate is redeemable for one year for merchandise only.

A Few Words About Bristol

ESTABLISHED in 1920, Bristol Nurseries first gained international prominence in 1927 with the introduction of *Gypsophila Bristol Fairy*. This is still unquestionably the last word in Baby'sbreath. Millions of plants have been grown as fillers for summer bouquets. At about this time the immortal Alex Cumming, truly a peerless plantsman, found time to consider the *Chrysanthemum* family. He conceived the idea of wedding the wild and carefree *C. coreanum* with our standard garden varieties of the day, many of his own raising. Result: in 1932 the first Korean Hybrids took the gardening world by storm. The matter-of-fact Mum took on new vigor, new colors and lustre, new forms—and tremendous new popularity. "Bristol" became synonymous with Mums the world over, and plants were shipped far and wide. Until his death in 1948, Mr. Cumming continued improving the Mum, also instituting the immensely popular display each fall. This work is still going on, not only with Mums, but with other plants as well.

By no means a one-plant specialist, Mr. Cumming also originated such grand plants as *Weigela Bristol Ruby*, *Hosta Honeybells*, *Phlox Salmon Glow*, *Veronica Icicle* and the *Double Platycodons*. This is only a partial list; Bristol also produced improvements in other genera, such as *Dianthus Anemone* and *Physostegia*, still to be found in many gardens. We hope to keep adding such worthy new gems as 1953's *Dianthus Spotlight* to our list, and continue breeding to that end. We also try to get the best from other sources, such as the new English Asters and *Phlox*, to supply our nation-wide trade.

For customers located in reasonable proximity to Bristol, we carry a complete line of evergreens, shrubs, trees, roses, bulbs and sundries. We think you'll enjoy the display of spring-flowering bulbs each May. Every October our noted Mum show attracts thousands of incredulous visitors to gasp at the gorgeously bedecked fields.

Yes, Bristol Mums, in particular, are really spectacular. We hope to number you among our satisfied clients this year. Order blank enclosed for your convenience.
